

PROFESSIONAL SUMMARY

Motivated **Full Stack Developer** with proven ability to **design, develop, and deliver** end-to-end web applications using **MERN stack and Java Spring Boot**. Independently built **5 production-level projects** across 4 technology stacks, demonstrating strong **analytical thinking** and **problem-solving** skills. Collaborated with cross-functional teams during a **3-month internship** to ship an E-Commerce platform. Certified in MERN, Python Full Stack, and Generative AI. **B.Tech (CS) 2026** graduate with **7.90 CGPA** — consistently ranking in the top academic tier. Passionate about writing clean, maintainable code and improving application performance through data-driven optimisation.

TECHNICAL SKILLS

Frontend

React.js

HTML5

CSS3

JavaScript (ES6+)

GSAP

Responsive Design

UI/UX Principles

Backend

Node.js

Express.js

Spring Boot

Java

PHP

Python

REST APIs

Database

MySQL

MongoDB

Database Design

Query Optimisation

Dev Tools

Git & GitHub

VS Code

Postman

Chrome DevTools

CS Fundamentals

OOP

Data Structures & Algorithms

DBMS

MVC Architecture

Agile Basics

PROJECTS

Jobhub — Full Stack Job Placement Portal

Full Stack

MERN + Java

React.js · Spring Boot · Java · MySQL | GitHub: github.com/khushijatiya

- Architected a multi-role web application supporting **3 user types** (Admin, Employer, Candidate) with separate dashboards, reducing navigation complexity by **40%**
- Engineered **15+ RESTful API endpoints** in Spring Boot achieving average response time under **200ms** across all CRUD operations
- Implemented JWT-based authentication and role-based access control, securing **100% of protected routes** against unauthorised access
- Optimised MySQL schema with **8 normalised tables** and indexed queries, improving data retrieval speed by **35%**

Online Voting System

Full Stack

HTML · CSS · JavaScript · PHP | GitHub: github.com/khushijatiya

- Designed server-side vote integrity logic enforcing **one vote per authenticated user**, achieving **0 duplicate votes** in all test scenarios
- Strengthened platform security through PHP session management and input sanitisation across **6 form endpoints**, eliminating SQL injection risk

K72ca — Fully Animated Modern Website

Frontend

React.js · GSAP | GitHub: github.com/khushijatiya

- Developed **10+ scroll-triggered GSAP animations** with timeline sequencing, achieving consistent **60 FPS** across all tested devices
- Improved page load performance to under **1.8 seconds** by implementing React lazy loading and code splitting
